RE: Letter of reference

To Whom it may concern:

Skystone Group LCC as a general contractor and primary modular manufacturer of the pioneering construction project of the world's tallest modular hotel – a 26-story AC Hotel 4* by Marriot in New York City, on 6th Avenue. During the manufacturing process we experienced several challenges with one of manufacturing subcontractors who was failing to reach Skystone's quality standards, and was falling behind schedule. Fortunately, we were able to retain the highly skilled services of iQ Module-Bud Invest Group who were paramount to the successful completion of the project. We would have no hesitation in recommending the services of iQ Module-Bud Invest Group, based in Poland, and we intend to collaborate with them again on future projects as well.

iQ Module-Bud Invest Group is professional and pays great attention to deadlines and to the high quality of services provided, which was proved during the production of 168 modules of hotel rooms – a crucial innovative element of the Marriot Group project commissioned by Skystone.

Cooperation with iQ Module-Bud Invest Group was smooth and in compliance with all confidentiality and integrity standards for the exchange of information. Moreover, the flexibility of iQ Module-Bud Invest Group as well as its commitment and contribution to the project implementation process allows Skystone to recommend it as a trustworthy and reliable partner for modular construction projects.

Yours sincerely,

Jack Dooley, CEO
